WORK EXPERIENCE

Infonet Global Tech

Software Engineer

Bandung, Indonesia

June 2021 – Present

- Contributed to multiple software development projects, handling both front-end and back-end responsibilities.
- Developed mobile applications using Flutter and built web applications with Vue.js.
- Designed, implemented, and managed back-end systems using Laravel and Node.js frameworks.

SOFTWARE PROJECTS

Personal Website : andrehaliim.netlify.app

AutoFleet Capital Mobile App

Dart, Flutter

- Developed a car auction application for companies in New Zealand, streamlining customer transactions.
- Designed and implemented user interfaces for key auction features, including stock listings, car details, recommendation emails, and direct bidding.

Sinar Agung Digital Mobile App

Dart, Flutter

- Developed a gold transaction application enabling company staff to sell items seamlessly.
- Designed and implemented key features, including selling, payment processing, and sales report visualization with diagrams.

FIKA Mobile App

Dart, Flutter

- Developed an application for system inspection in the field using a questionnaire-based method.
- Implemented an issue reporting feature to notify the central team of any difficulties encountered during the questionnaire process.

Vehicle Tracking System (VTS) Mobile App

Dart, Flutter

- Developed an application to monitor the vehicle delivery process for a car trading company.
- Integrated real-time map tracking to provide live vehicle location updates and implemented a barcode scanning feature for vehicle identification.
